**PROTECTING YOUR BUSINESS IS
MORE THAN SECURING YOUR PREMISES.**

Protect your Business

Plans help protect your business, assets, employees and assist your business to recover quickly and continue operating after a disaster or business disruption.

When developing a business emergency plan, it is important to consider the following points:

- Do you know the hazards that threaten your business?

- What are the consequences if the hazard eventuates?

- What is crucial for your business's survival?

- What steps will you take to minimise/prevent the impact from occurring?

- Have you recorded key information you need prior to, during and after a disruption/disaster?

- Have you completed a business evacuation plan?

- Do you have a business emergency kit?

- Have you checked your insurance?

- Are your staff trained for disruptions/disasters?

- Have you tested your plan?
